

We would like to reassure all our patients that we are following all guidelines suggested to minimize any risk of transmission of the Covid-19 virus. We will be continually reviewing and communicating the measures we are taking.

1. Patients will be screened at the time of booking and will be asked to update us of any changes to circumstance. We cannot treat or receive any patient into the building who either have symptoms of Covid-19 themselves or have been in contact with an infected person within the previous 14 days.

2. Patients are asked to wear a mask when attending. As an extra precaution, we ask patients to wash their hands with soap and warm water in the bathroom facility provided upon arrival. Patients may wear gloves if they wish and we will be taking temperatures on arrival to the premises. Patients will be asked to wash their hands again at the end of treatment.

3. Patient appointments are spaced to comply as much as possible with social distancing advice and we would encourage you not to bring any family members or friends into the building unless absolutely necessary.

4. We are following all suggested guidelines of safe practice with regard to practice management, with

clear procedures for sanitization of the clinic and care of our personal health and protection.
